КЕРАМІЧНА МАНУФАКТУРА ДОНБАСУ

THE MANUFACTURE OF CERAMIC GRANITE VASES

Vases made of ceramic granite and produced on the latest technology, specially designed by highly qualified engineers and designers.

The ceramic granite vases will be an exclusive and modern addition both to any interior and exterior, whether it is an office, a hotel, a shopping center or a cozy home.

A variety of shapes, colors and textures allows you to choose a vase for any room, building's facade, terrace and landscape design.

When choosing vases made of ceramic granite, they will bring peace, reliability and individuality as a design element to the interior as well as to the exterior of any building.

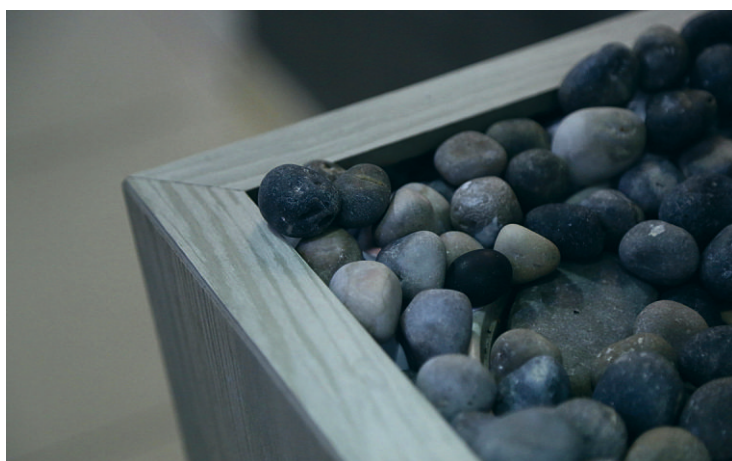

These vases made in modern style, fit harmoniously into the restrained and official style of premises.

Cache pot and vases from ceramic granite will be a beautiful stylized hedge for summer restaurants and cafes.

You will give aesthetic and style-forming importance of the garden and its separate corners when creating a landscape design using different compositions of our decorative vases.

This vases' style fit for mixed design style both of interior and exterior amazingly.

Natural materials and universal shades of vases from ceramic granite create an amazing, mesmerizing picture of a harmoniously created space.

**INDISPUTABLE ADVANTAGE
OF CERAMIC GRANITE VASES
IS THEIR AESTHETIC PROPERTIES
ALONG WITH DURABILITY
AND PRACTICALITY**

These vases are an ideal element to decorate any space - from huge office and hotel centers to country mansions, restaurants and cafes due to their universality and practicality

MODERN TECHNOLOGIES AND HIGH QUALITY

Using of modern technologies and materials ensures high quality of products, which makes it possible to compete with flowerpot and cache pot from artificial and natural materials. A variety of textures and colors will satisfy the imagination of the most experienced customer.

VARIATIONS OF SHAPES AND COLORS

The vases are produced from the tile of 10- and 20- mm thickness.

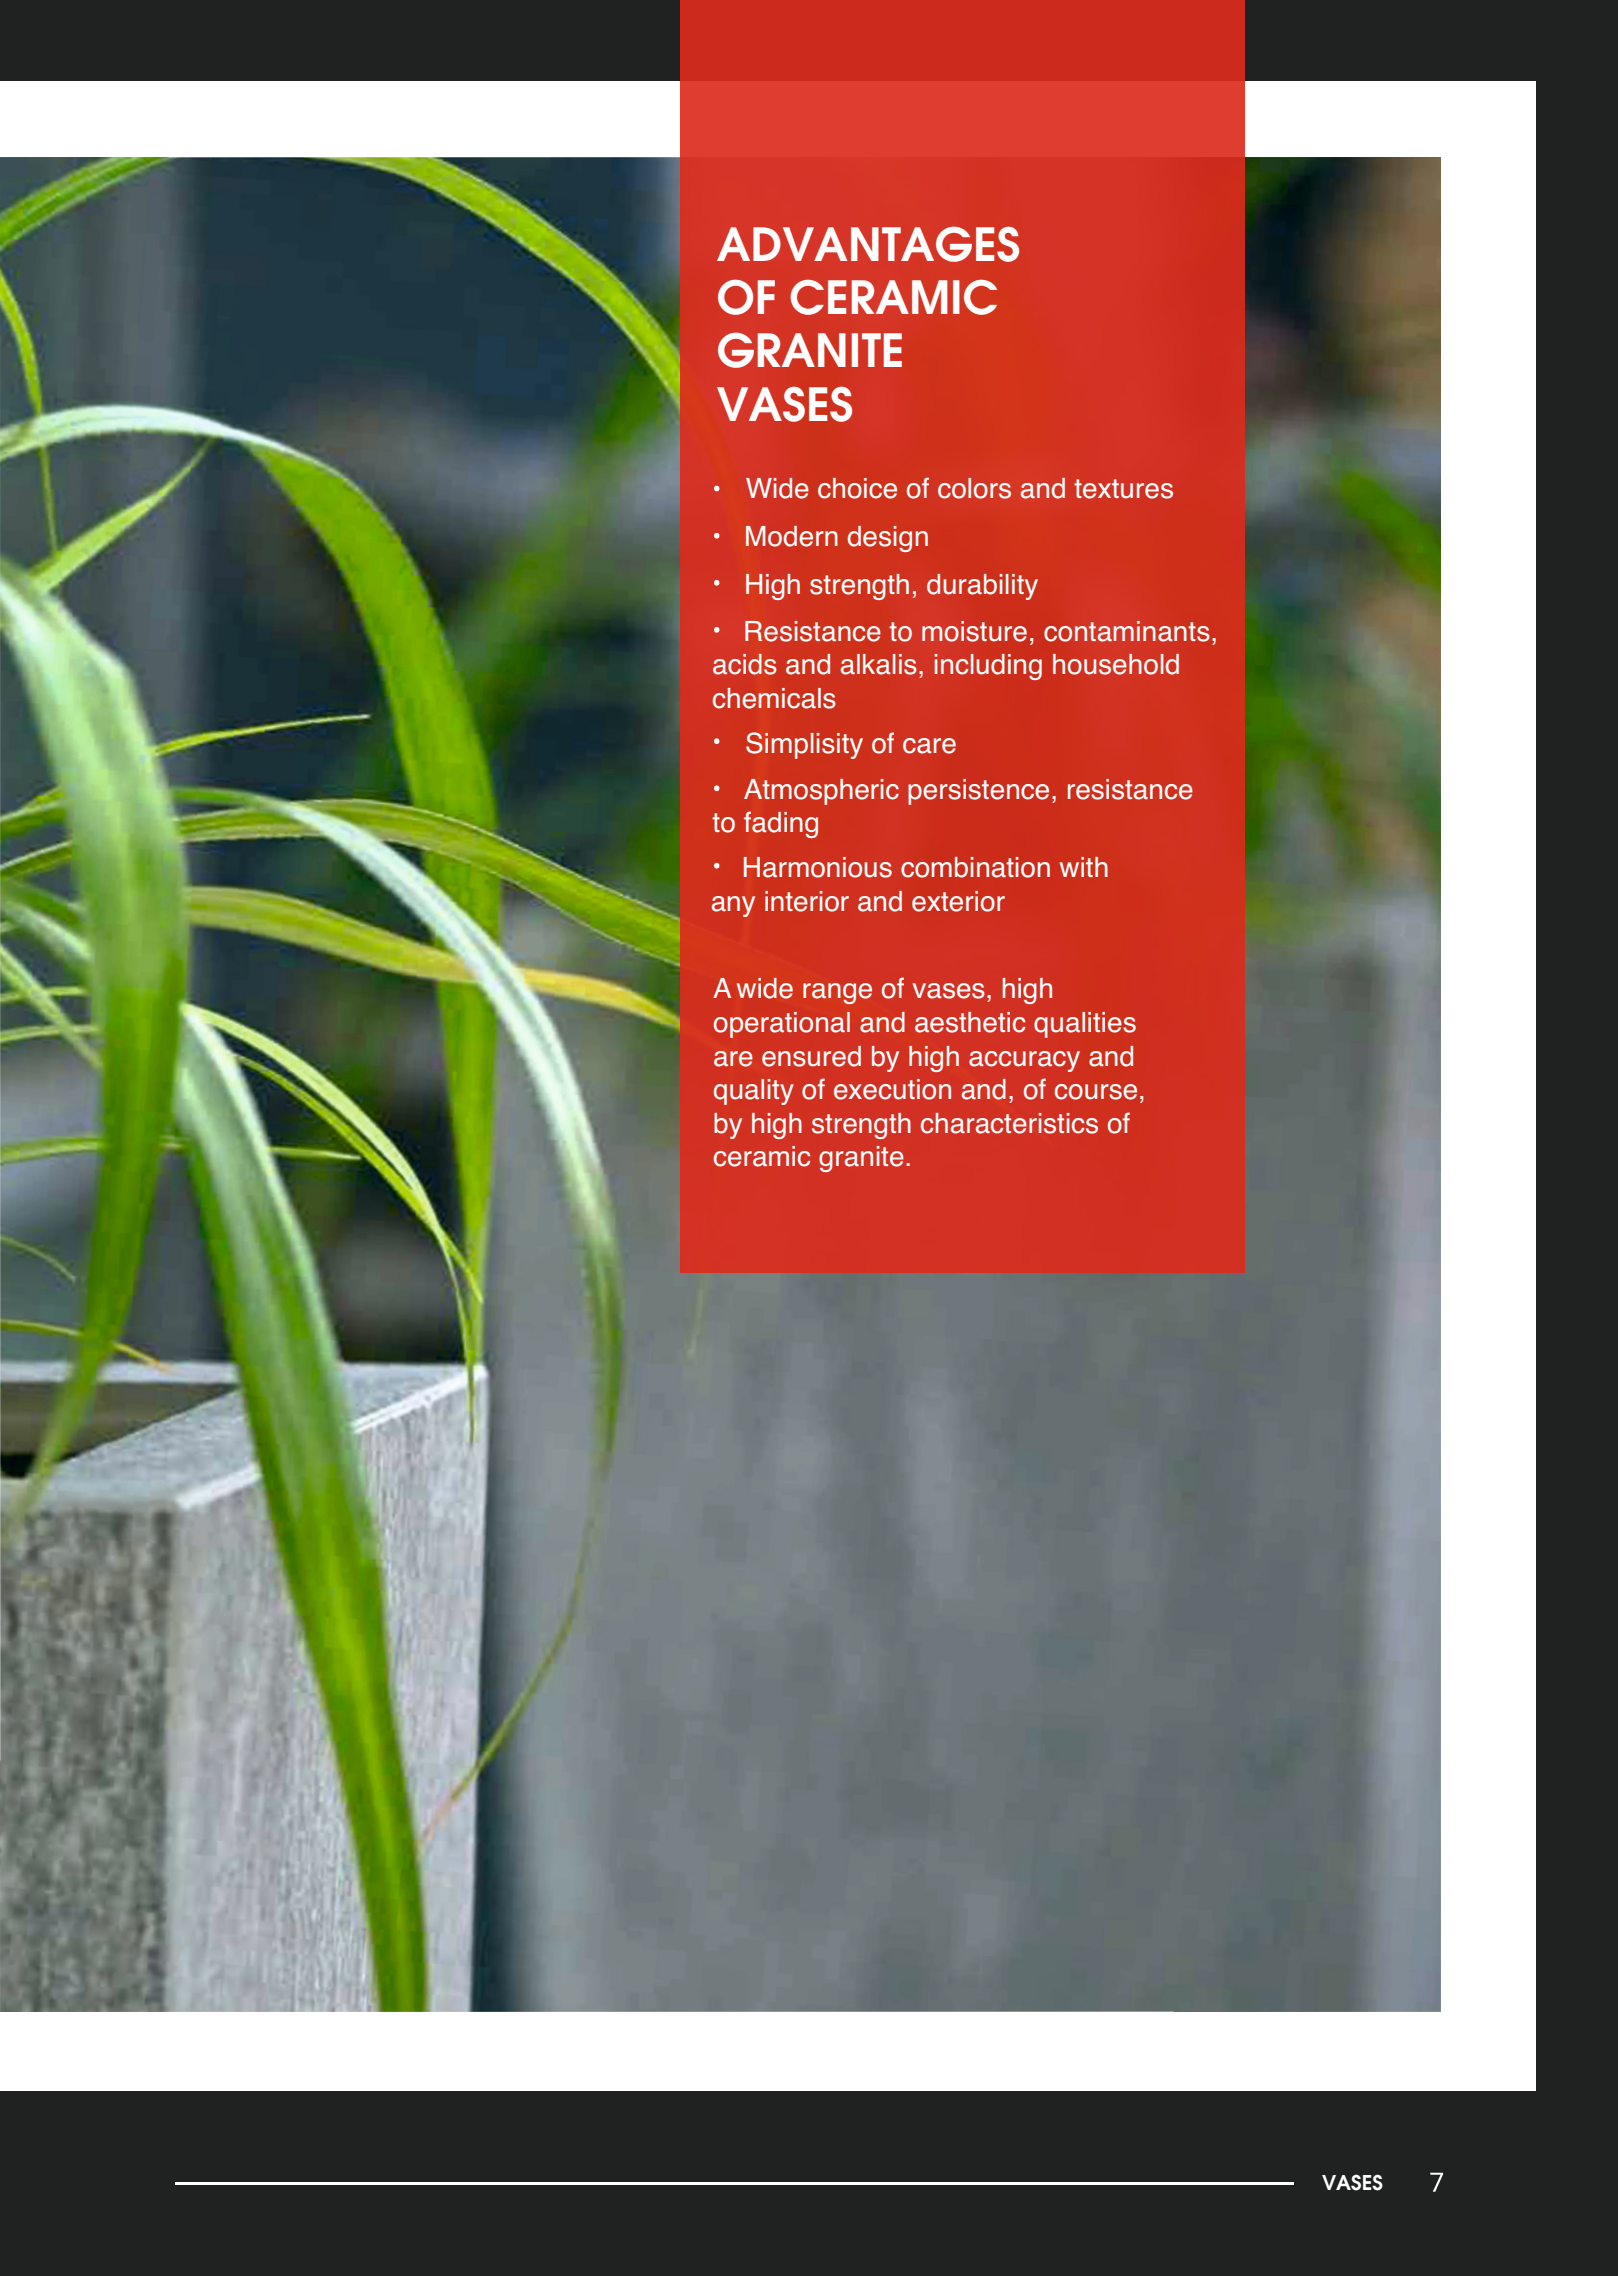

The dimensions of the vases are limited solely by the original dimensions of the tile.

USING INNOVATIVE MATERIALS

High performance properties of the vases are ensured in any conditions, including extreme weather conditions because of particularly durable combined innovative composition.

ADVANTAGES OF CERAMIC GRANITE VASES

- Wide choice of colors and textures
- Modern design
- High strength, durability
- Resistance to moisture, contaminants, acids and alkalis, including household chemicals
- Simplicity of care
- Atmospheric persistence, resistance to fading
- Harmonious combination with any interior and exterior

A wide range of vases, high operational and aesthetic qualities are ensured by high accuracy and quality of execution and, of course, by high strength characteristics of ceramic granite.

THE MANUFACTURE

Manufacture of steps and skirting boards is carried out on high-precision Italian equipment and technologies of leading construction and engineering companies. Heavy-duty ceramic granite tiles turn into an ideal vase of modern design, executed with filigree precision, because of new technologies and high qualification of the personnel.

Products are manufactured under controlled conditions, established The Quality Management System, functioning in accordance with the requirements of ISO 9001: 2015 and certified by BV Certification; certificate number:UA 228088/1

WHY IS CERAMIC GRANITE?

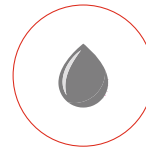

ENDLESS VARIETIES
OF COLOURS AND
TEXTURES FROM
NATURAL STONE
AND WOOD
TO METAL AND
FABRIC.

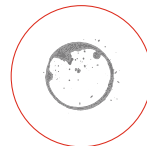

Products made of ceramic granite have a number of basic properties that distinguish them favorably from products made of natural stone.

Modern technologies allow to apply on the surface of the tile almost any pattern.

RESISTANCE TO EXTREMES OF TEMPERATURE.
Remains unscathed even at temperatures below -30. When the temperature drops, the glaze does not crack.

LOW WATER ABSORPTION.
Low water absorption index (<0,05%) provides a high degree of frost resistance

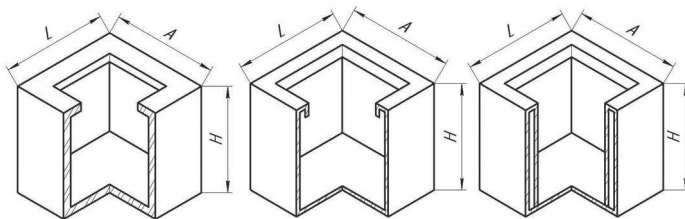

RESISTANT TO STAINS, SIMPLISITY OF CLEANING AND MAINTAINING.
Ceramic granite is very resistant to the effects of stain-forming substances, and it can be easily washed.

HARDNESS OF THE GLAZE ON THE MOHS SCALE.
Ceramic granite has a high hardness(8-9 points on the MOHS scale) and high performance characteristics, which makes it possible to use it under the most severe conditions.

VARIATIONS

It is possible to produce vases with different dimensions from those that mentioned in the table, as agreed with the customer

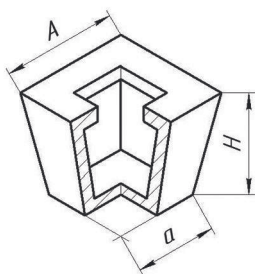

Vaso a Muro I

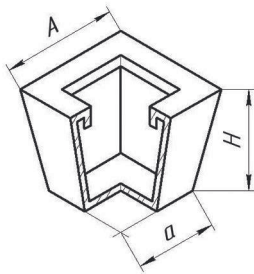

Vaso a Muro II
